Bipartisan Legislative Proposal Makes Procurement Easier

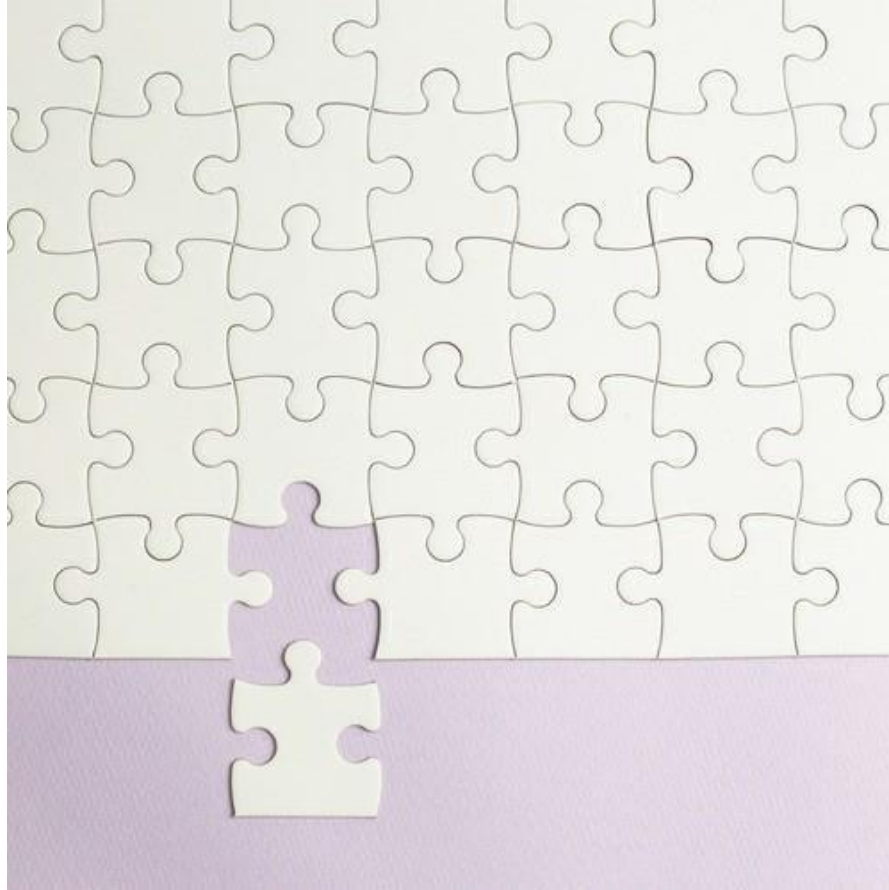

Natalie Alms reports in Washington Technology on the Federal Improvement in Technology - or FIT - Act introduced by Senator Gary Peters, D-Michigan and Senator Ted Cruz, R-Texas. The legislation is designed to assist innovative businesses, including small businesses, compete for federal contracts by reducing red tape and utilizing special acquisition authorities.

FEATURED RESOURCE

The Greg and Camille Baroni Center for Government Contracting, at George Mason University, is the first-in-the-nation university center to address the business, policy, and regulatory issues in government contracting. The composition of its faculty and students, combined with its geographic location near the federal government and many of the nation's leading government contractors, makes them uniquely situated to foster research, education, and collaboration within the government contracting community.

FEATURED CUSTOMER

Republic's customer, a leader in the development of hypersonic delivery systems for orbital and suborbital, commercial, civil, and defense market applications, recently conducted a series extremely successful tests of their propulsion system. The team's extensive engineering experience has led to an affordable, reliable, and rapid scramjet and rocket propulsion solution that is proving to be invaluable to the U.S. defense community's highest priority of acquiring cutting-edge hypersonic missile systems capabilities.

"Start where you are. Use what you have. Do what you can."
